SUMMARY

Full Stack AI Engineer with a B.Tech in AI & ML, currently building AI and backend systems for fintech at String Metaverse. Experienced in Python, REST APIs, PostgreSQL, Redis, AWS, LLM applications, and data processing workflows. Skilled in building production-ready systems across backend, AI, and data layers, with a strong interest in reliable data pipelines and analytics-ready data.

CORE SKILLS

- **Programming & Backend:** Python, SQL, Node.js, Bun, FastAPI, Flask, REST APIs
- **Data Engineering:** Pandas, SQLAlchemy, ETL/ELT, Data Validation, Data Processing, Background Workers
- **Databases & Storage:** PostgreSQL, MySQL, MongoDB, Redis, AWS S3
- **AI & ML:** RAG, LangChain, Hugging Face, OpenAI APIs, Machine Learning, NLP
- **Frontend & Visualization:** Next.js, Streamlit, Power BI, Matplotlib
- **Cloud & DevOps:** AWS, Docker, Git, GitHub

WORK EXPERIENCE

String Metaverse (via Torus Kling Fintech Pvt. Ltd.) — *Hyderabad, India*
Software Associate *Jul 2025 – Present*

- Designed and developed AI and backend components for fintech data and intelligence use cases.
- Worked with Python, PostgreSQL, REST APIs, structured data processing, and validation workflows.
- Built and integrated LLM-based applications with focus on prompt engineering, API integration, and reliable responses.
- Developed a **Polymarket algorithmic trading bot** with real-time market-data ingestion and indicator-based trading logic.
- Worked with Git, AWS, secure API integrations, and Agile development practices.

DevZen Software Solutions Pvt. Ltd. — *Narsapur*
Data Science & Machine Learning Intern *Nov 2024 – May 2025*

- Developed and deployed machine learning models using behavioral and transactional data for business use cases.
- Built a customer churn prediction model through data preparation, model development, evaluation, and delivery.
- Built NLP models using BERT/GPT for question answering and text summarization.
- Developed CNN-based image classification models using Roboflow and Hugging Face datasets.
- Worked in an Agile environment and managed end-to-end ML workflows.

EDUCATION

- **Swarnandhra College of Engineering and Technology, India** *2021 – 2025*
- Bachelor of Technology — Artificial Intelligence and Machine Learning | **CGPA: 8.48 / 10**
- **K.V.M. Chamber's Junior College, Palakollu, India** *2019 – 2021*
- Intermediate (M.P.C) | **Marks: 967 / 1000**

RELEVANT PROJECTS

BillsOnChain — Automated Bill Processing & Rewards Platform

Tech Stack: Bun (Node.js-compatible runtime), Next.js, PostgreSQL, Redis, BullMQ, AWS S3, OpenRouter, IPFS (Pinata)

- Built REST APIs using Bun for bill upload, validation, and reward workflows, with schema-based input validation and centralized error handling.
- Designed a **5-stage bill processing pipeline — Hash → OCR → Dedup → Fraud Check → NFT Mint** — using Redis-backed BullMQ workers to automate the full bill-to-reward lifecycle.
- Uploaded NFT artwork and metadata to IPFS via Pinata before each mint, keeping reward assets stored in decentralized storage.
- Integrated AWS S3 for bill storage with presigned uploads and bucket policies restricting file access.
- Used OpenRouter for LLM-based OCR extraction of merchant, amount, and category from bill images, with automatic model fallback on failure.
- Queried PostgreSQL through parameterized Prisma queries to prevent SQL injection.
- Worked in an Agile team through sprint planning, daily standups, and peer code reviews.

Stock Optimus — Commodity Price Prediction & Stock Optimization

- Developed an **LSTM-based deep learning model** to forecast prices of **22 essential food commodities** across India using real-time data from **550+ reporting centers**.
- Integrated **weather APIs, seasonality, and market trend analysis** to enhance prediction accuracy.
- Built an interactive **visual dashboard** for price trend insights and designed a **buffer stock optimization mechanism** for data-driven decision-making.

ExploreData

- Built a **Streamlit-based Python application** that allows users to upload datasets in **CSV, XLSX, or XLS formats** and provides instant insights, statistics, and visualizations.
- Supports reproducibility through code snippets and includes **file-type and size validation** on uploads to handle user input safely.

ACHIEVEMENTS

- **Finalist & Merit Certificate Holder — PALS ECU CTF 2024, IIT Madras**: secured a merit certificate at a national-level Capture The Flag competition covering web exploitation, cryptography, and forensics.
- **Viksit Bharat @2047** — District Level Declamation Winner and State Level Participant.
- Participated in several college-level competitions including hackathons and project expos.

CERTIFICATIONS

- **Introduction to Cybersecurity** — Cisco Networking Academy
- **AWS Academy Graduate — Machine Learning Foundations**
