SUMMARY

An enthusiastic **B.Tech graduate** specializing in **Artificial Intelligence and Machine Learning**, currently working as an **AI Engineer at String Metaverse**. Strong academic foundation in AI, Machine Learning, and Data Science, with growing hands-on exposure to **cybersecurity** through **Capture The Flag (CTF) competitions** — including being a **Finalist at PALS ECU CTF 2024 (IIT Madras)**. Skilled in building applications, working with APIs, and applying analytical thinking to solve real-world problems. Looking to begin a career in **cybersecurity** and contribute to building secure, intelligent systems.

CORE SKILLS

- **Programming & Frameworks:** Python, Node.js, NumPy, Pandas, Flask, FastAPI
- **Cybersecurity:** Web Application Security, Cryptography Basics, Network Fundamentals (TCP/IP, HTTP/S, DNS), Authentication & Authorization
- **Visualizations:** Matplotlib, Seaborn, Streamlit, PowerBI
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Advanced AI & Tools:** Retrieval-Augmented Generation (RAG), LangChain, Hugging Face Transformers, OpenAI APIs
- **Soft Skills:** Communication, team management, adaptability, public speaking

WORK EXPERIENCE

String Metaverse (via Torus Kling Fintech Pvt. Ltd.) — *Hyderabad, India*

Software Associate (AI Engineer)

Jul 2025 – Present

- Designed and developed ML-driven applications for fintech data intelligence.
- Performed model optimization, prompt engineering, and response refinement to improve LLM answer accuracy.
- Worked with secure API integrations and followed safe handling of API keys and user data.
- Collaborated in Agile teams with developers and product managers to deliver reliable and scalable AI components.

DevZen Software Solutions Pvt. Ltd. — *Narsapur*

Data Science & Machine Learning Intern

Nov 2024 – May 2025

- Developed and deployed **machine learning models** to enhance business operations.
- Managed **end-to-end ML lifecycles** using Agile methodology.
- Created a **customer churn prediction model** from behavioral and transactional data, helping improve customer retention strategies.
- Built NLP models (BERT, GPT) for question answering and text summarization.
- Developed CNN models for image classification using Roboflow and HuggingFace datasets.

Palo Alto Networks (via Cybersecurity Academy) — *Virtual Internship*

Cybersecurity Intern

2023 (10 Weeks)

- Completed a 10-week structured cybersecurity training program covering **cybersecurity fundamentals, network security, and firewall concepts**.
 - Gained hands-on exposure through guided labs on **network defense, traffic analysis, and security policies** used in enterprise environments.
 - Built foundational understanding of **threat landscapes, attack vectors, and defense mechanisms** — applied later in CTF practice and project work.
-

RELEVANT PROJECTS

Bills on Chain

Stack: Node.js, Express, Redis, PostgreSQL, AWS S3, Amazon Bedrock

- Contributed to developing **REST APIs using Express** for bill upload, validation, and reward workflows, with **input validation and proper error handling**.
- Integrated frontend with backend services for bill ingestion and tracking, using **AWS S3 with bucket policies** for file storage.
- Implemented API flows for the bill lifecycle (upload → processing → rewards) using Redis-backed queues.
- Contributed to scalable backend architecture with **parameterized database queries** to prevent SQL injection.

Stock Optimus — Commodity Price Prediction & Stock Optimization

- Developed an **LSTM-based deep learning model** to forecast prices of **22 essential food commodities** across India using real-time data from **550+ reporting centers**.
- Integrated **weather APIs, seasonality, and market trend analysis** to enhance prediction accuracy.
- Built an interactive **visual dashboard** for price trend insights and designed a **buffer stock optimization mechanism** for data-driven decision-making.

ExploreData

- Built a **Streamlit-based Python application** that allows users to upload datasets in **CSV, XLSX, or XLS formats** and provides instant insights, statistics, and visualizations.
- Supports reproducibility through code snippets and includes **file-type and size validation** on uploads to handle user input safely.

ACHIEVEMENTS

- **Finalist & Merit Certificate Holder — PALS ECU CTF 2024, IIT Madras**: secured a merit certificate at a national-level Capture The Flag competition covering web exploitation, cryptography, and forensics.
- **Viksit Bharat @2047** — District Level Declamation Winner and State Level Participant.
- Participated in several college-level competitions including hackathons and project expos.

CERTIFICATIONS

- [Introduction to Cybersecurity](#) — Cisco Networking Academy
- [AWS Academy Graduate — Machine Learning Foundations](#)

EDUCATION

Swarnandhra College of Engineering and Technology, India Bachelor of Technology — Artificial Intelligence and Machine Learning CGPA: 8.48 / 10	2021 – 2025
K.V.M. Chamber's Junior College, Palakollu, India Intermediate (M.P.C) Marks: 967 / 1000	2019 – 2021
